INNERGY

The AI Leadership Readiness Assessment

WhatsApp Bot — User Experience Flow

Product Brief for Developer · Version 1.0 · Innergy

Purpose of This Document

This document describes the complete user experience flow for the Innergy AI Leadership Readiness Assessment, delivered via a WhatsApp bot. It is intended for the product developer building the bot and covers every message, interaction, scoring logic, result display, and follow-up sequence.

The assessment measures a leader's readiness across three dimensions of Full Spectrum Leadership: Cognitive Clarity, Relational Influence, and Inner Mastery. It is designed for CXO-level leaders as a self-assessment tool. Results are scored automatically and displayed in WhatsApp. Rashmi Sharma (Innergy) is the coach for all follow-up.

Assessment Overview

Delivery Channel	WhatsApp Bot
Total Questions	24 (8 per dimension)
Question Format	4-option multiple choice — user types A, B, C, or D
Estimated Time	12-15 minutes
Scoring	Automatic — calculated per section and overall
Result Format	3 dimension scores + 1 overall score + interpretation
Follow-up	Coaching CTA with Rashmi Sharma (Innergy)
Entry Point	QR code scan → opens WhatsApp bot directly

Complete User Experience Flow

STEP 1

Entry — QR Code Scan

User scans QR code from any Innergy touchpoint

When the user scans the QR code, they are taken directly to a WhatsApp chat with the Innergy bot. The first message appears automatically — the user does not need to type anything to begin.

> NOTE: The QR code should pre-populate the WhatsApp chat with a trigger message (e.g. 'START') so the bot activates immediately on scan without the user needing to type first.

STEP 2

Welcome — Bot Opens the Conversation

3 messages maximum · Warm but brief

The bot sends three short messages in sequence. WhatsApp messages should be conversational and brief — no long paragraphs.

INNERGY BOT

Hi! I'm the Innergy Leadership Assessment bot. 👋I work with Rashmi Sharma — leadership coach and founder of Innergy.

INNERGY BOT

In the next 12-15 minutes, I'll help you understand how ready you are as a leader for the AI age — across three dimensions: how you think, how you lead your team, and how you show up under pressure.

INNERGY BOT

Ready to begin? Type YES to start — or type LATER if now isn't a good time and I'll remind you tomorrow.

USER

YES

STEP 3

Personalisation — Name and Organisation

2 questions · Used to personalise the result

INNERGY BOT

Great. Before we start — two quick things.What's your first name?

USER

[Name]

INNERGY BOT
And which organisation are you from, [Name]?

USER
[Organisation]

INNERGY BOT
Perfect. Let's begin, [Name].

NOTE: Store name and organisation for use in result message personalisation. Do not ask for email at this stage — it creates friction. Email can be requested optionally at the end.

STEP 4
Section Introduction — Cognitive Clarity
1 message · Sets context before questions begin

INNERGY BOT
SECTION 1 OF 3: COGNITIVE CLARITYThis section is about how you think and decide — especially when things are fast-moving, ambiguous, or genuinely new.For each question, reply with A, B, C, or D.

STEP 5
Questions — Cognitive Clarity
8 questions · One at a time · Bot waits for reply before sending next

Each question is sent as a single WhatsApp message. The bot waits for the user to reply with A, B, C, or D before sending the next question. If the user sends an invalid response, the bot gently prompts again.

INNERGY BOT
Q1 of 8When I have to make an important decision but don't have all the information I need, I typically:A — Wait until I have more clarity before committingB — Make a provisional call and stay open to changing itC — Ask others to decide or escalate upwardD — Push forward with what I know and adjust as I go

USER
B

INNERGY BOT

Q2 of 8When something urgent lands on my desk — a complaint, a request, a crisis — my first instinct is to:A — Deal with it immediately so it's off my plateB — Assess whether it actually needs my attention right nowC — Delegate it and check back laterD — Ask what is behind it before deciding what to do

NOTE: Continue Q3 through Q8 in the same format. Bot sends one question at a time. No skipping ahead. Progress indicator (Q3 of 8) shown in each message.

INVALID RESPONSE HANDLING

USER
Not sure

INNERGY BOT
Please reply with A, B, C, or D to continue. Take your time — there are no right or wrong answers.

STEP 6

Section Transition — Relational Influence

1 message · Brief acknowledgment + next section intro

INNERGY BOT
Section 1 complete. ✓SECTION 2 OF 3: RELATIONAL INFLUENCEThis section is about your team — how you lead together, make decisions, give feedback, and respond to change.Answer based on how your top team operates as a whole.

NOTE: Relational Influence questions are about the team, not the individual. The section intro must make this clear so respondents don't answer as if it's still about themselves personally.

STEP 7

Questions — Relational Influence

8 questions · Same format as Section 1

INNERGY BOT
Q1 of 8When our team makes a decision, people execute because they genuinely believe in it — not just because it was decided at the top:A — This rarely happens — people comply but don't always commitB — This happens with some decisions but not othersC — This usually happens — we invest time building understandingD — This consistently happens — we don't move until people genuinely understand why

NOTE: Continue Q2 through Q8 in same format. Same invalid response handling applies.

STEP 8

Section Transition — Inner Mastery

1 message · Brief acknowledgment + next section intro

INNERGY BOT

Section 2 complete. ✓SECTION 3 OF 3: INNER MASTERYThis section is personal. It's about your inner experience — how you feel under pressure, how you recover, and the quality of presence you bring to the people around you.Answer honestly. These questions are often the most revealing.

STEP 9

Questions — Inner Mastery

8 questions · Same format as previous sections

INNERGY BOT

Q1 of 8When I am in a high-stakes situation — a crisis, a difficult board conversation, a major decision under time pressure — I notice my thinking:A — Becomes scattered — I react to whatever feels most urgentB — Narrows — I focus but lose access to the wider contextC — Stays mostly clear — pressure doesn't significantly affect my thinkingD — Sharpens — high-stakes situations bring out my clearest thinking

NOTE: Continue Q2 through Q8 in same format.

STEP 10

Completion Acknowledgment

1 message · Warm · Brief · Sets up results

INNERGY BOT

You've completed all 24 questions, [Name]. ✓Calculating your Full Spectrum Leadership scores now...

NOTE: Add a 2-3 second delay here before sending results. Creates a sense of calculation and anticipation. Do not send results immediately.

STEP 11

Results — Three Dimension Scores

3 messages · One per dimension · Sent in sequence

Results are sent as three separate messages — one per dimension — followed by the overall score message. Each message shows the score, the band, and one line of interpretation.

INNERGY BOT

COGNITIVE CLARITYYour score: 34 / 40Band: StrongYou think clearly under pressure, adapt when plans change, and orient your thinking toward the long term. This is a genuine asset in the AI age.

INNERGY BOT

RELATIONAL INFLUENCEYour score: 27 / 40Band: DevelopingYour team has real relational capability but it shows friction when navigating change, cross-functional conflict, or letting go of legacy initiatives. Targeted work here will create disproportionate return.

INNERGY BOT

INNER MASTERYYour score: 22 / 40Band: At RiskYour inner state under sustained pressure is affecting your judgment and presence more than you may realise. This is not a character issue — it is a capacity issue that can be built.

NOTE: Score and band are calculated dynamically from actual responses. The interpretation text for each band is pre-written per dimension — bot selects the correct interpretation based on score range.

STEP 12

Results — Overall Score

1 message · Summary + overall band

INNERGY BOT

YOUR FULL SPECTRUM LEADERSHIP SCORECognitive Clarity: 34 / 40 ✦ StrongRelational Influence: 27 / 40 ✦ DevelopingInner Mastery: 22 / 40 ✦ At RiskOVERALL: 83 / 120Readiness Level: Partially ReadyYou have real strengths — and a clear gap. Your lowest dimension is your most urgent priority. Full Spectrum Leadership only works when all three are present.

NOTE: The overall score message includes all three dimension scores as a summary table, the overall score out of 120, and the overall band interpretation. Keep it tight — WhatsApp messages should not be walls of text.

STEP 13

Visual — Full Spectrum Leadership Circle

1 message · Image · Sent after overall score

After the overall score message, the bot sends a visual — a Full Spectrum Leadership circle diagram with the three dimension scores shown. This is a pre-generated image personalised with the user's scores.

NOTE: DEVELOPER NOTE: Generate a simple circular diagram image dynamically with three segments — Cognitive Clarity, Relational Influence, Inner Mastery — each shaded according to the score band (Strong = dark brown, Developing = light brown, At Risk = pink, Critical Gap = grey). Include the score number in each segment. Send as an image attachment in WhatsApp. If dynamic image generation is not feasible in V1, send a static Innergy Full Spectrum Leadership image instead and display the scores as text only.

STEP 14

Debrief CTA — Coaching with Rashmi

2 messages · Warm · Direct

INNERGY BOT

Your results tell a story, [Name]. And the most valuable thing you can do with them is talk through what they mean for your specific context — your role, your team, and where you are right now.

INNERGY BOT

Rashmi Sharma — who built this assessment — offers a limited number of 20-minute debrief conversations each month with senior leaders.Would you like to book one?Type YES to get the booking linkType NO if you'd prefer to sit with your results first

IF USER TYPES YES

USER

YES

INNERGY BOT

Here's Rashmi's booking link:[INSERT CALENDLY LINK]Choose any 20-minute slot that works for you. Rashmi will have your results before the call so you can go straight into the conversation that matters.

IF USER TYPES NO

USER

NO

INNERGY BOT

Completely understood. Your results will stay here whenever you're ready to revisit them.If you change your mind, Rashmi's booking link is: [INSERT CALENDLY LINK]

STEP 15

Coaching Interest — Optional Follow-Up

1 message · Sent after CTA response

After the debrief CTA, the bot asks one final question about coaching interest. This is a light-touch signal question — not a pitch.

INNERGY BOT

One last question — are any of your three dimensions something you'd want to actively work on with a coach?Type YES if you'd like to explore coachingType NO if you're just here for the assessment for now

IF USER TYPES YES — COACHING INTEREST

USER

YES

INNERGY BOT

Noted. Rashmi works with a small number of senior leaders on exactly this — building the Full Spectrum Leadership infrastructure through a structured coaching programme.She'll reach out within 48 hours to share more. No pressure — it's just a conversation.

NOTE: DEVELOPER NOTE: When user types YES to coaching interest, trigger a notification to Rashmi (email or WhatsApp) with the user's name, organisation, scores, and coaching interest flag. This is a warm lead — it should reach Rashmi within minutes, not hours.

IF USER TYPES NO — COACHING INTEREST

USER

NO

INNERGY BOT

Understood. If that ever changes, you know where to find Rashmi. 🙏

STEP 16

Closing Message

Final message · Warm close · LinkedIn invite

INNERGY BOT

Thank you for taking the time to do this, [Name]. Most leaders never stop to look at themselves honestly.If you found this useful, Rashmi shares thinking on leadership and the AI age every week on LinkedIn. Worth a follow.[INSERT LINKEDIN URL]Wishing you well. 🙏— The Innergy Team

NOTE: This is the end of the conversation flow. The bot does not send further unprompted messages after this point unless a follow-up reminder sequence is triggered (see Optional: Reminder Flow below).

Scoring Logic — Developer Reference

Each answer option (A, B, C, D) maps to a score value per question. The score values are defined in the answer key document (separate). The bot calculates three section totals and one overall total automatically.

Section	Questions	Max Score	Bands
Cognitive Clarity	8	40	33-40 Strong · 24-32 Developing · 15-23 At Risk · 8-14 Critical
Relational Influence	8	40	33-40 Strong · 24-32 Developing · 15-23 At Risk · 8-14 Critical
Inner Mastery	8	40	33-40 Strong · 24-32 Developing · 15-23 At Risk · 8-14 Critical
OVERALL	24	120	98-120 AI-Ready · 72-97 Partially Ready · 48-71 At Risk · 24-47 Critical

---

Error and Edge Case Handling

Invalid Answer

INNERGY BOT

Please reply with A, B, C, or D to continue. Take your time — there are no right or wrong answers.

User Types LATER at Welcome

INNERGY BOT

No problem. I'll remind you tomorrow. Type START any time to begin whenever you're ready.

NOTE: Set a reminder to re-send the welcome message 24 hours later. Maximum 2 reminders. Do not message again after that.

User Goes Silent Mid-Assessment

If the user does not respond to a question within 24 hours, send one gentle reminder:

INNERGY BOT

Still here when you're ready, [Name]. You were on Q[X] of Section [Y]. Reply with A, B, C, or D to continue.

NOTE: Send maximum one reminder per abandoned session. If no response after a further 48 hours, close the session gracefully. Do not re-trigger unless the user scans the QR code again.

Optional Features for V2

The following are not required for V1 but should be considered for the next build:

1. Email capture — optional prompt at the end to send a PDF version of results to the user's email
2. Team assessment mode — invite multiple leaders to complete, aggregate results into a team report
3. Progress save — allow user to exit and resume mid-assessment without losing answers
4. Dynamic image generation — personalised Full Spectrum Leadership circle with user's scores rendered as a live image
5. Innergy dashboard — Rashmi can see all completed assessments, scores, and coaching interest flags in one view

---
